## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed 8/5/05, with respect to the rejection(s) of claim(s) 1-7 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of previously cited prior art.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueyama (5,204,629) (previously cited on PTO 892 – Paper No. 20050509). Ueyama discloses a patient bed mechanism for a magnetic resonance imaging system adapted to receive a subject, movable into and out of the examination space, a coupling unit for coupling a gradient coil unit to the bed mechanism, where the bed mechanism moves toward the gradient coil and releasing the coil unit from the patient bed when the bed again moves in the movement direction (abstract, col. 3 lines 15-50, col. 4 lines 53-68). Ueyama further teaches said system to comprise a cart for receiving the coil unit with connection of the cart to the sensor (col. 5 lines 3-12). The system further includes a guide or

control device to guide the gradient coil unit through the examination space (col. 5 lines 25-40, col. 6 lines 15-44).
